

Contents:

Preface, XI–XII.

1. Introduction to mineralogy, 1.

1.1. Mineral and Mineralogy, 3–5.

1.2. Mineral Formation Processes, 5.

1.3. Crystalline State and the Chemical Composition of Minerals, 6–7.

1.4. Crystallography, 7–8.

1.4.1. Symmetry Elements and Symmetry Operations, 8.

Point Symmetry, 8–10.

Translational Symmetry, 10.

1.4.2. Space Lattices and Unit Cell, 10–11.

1.4.3. Bravais Lattices and Crystal Systems, 11–12.

1.4.4. Point Groups, 12–13.

1.4.5. Space Groups, 13–14.

1.4.6. Crystal Faces and Crystal Forms, 15–19.

1.5. Chemistry of Minerals, 20.

1.5.1. All is Chemistry, 20.

1.5.2. Nature of Atoms and Elements, 20–27.

1.5.3. Chemical Bonds, 28.

Ionic Bond, 28–29.

Covalent Bond, 29–31.

Metallic Bond, 31–33.

Intermediate Bonds, 33.

Hydrogen Bond, 33

Van der Waals Bonds, 34.

1.5.4. Isomorphism and Solid Solutions, 35–37.

1.5.5. Polymorphism, 37.

1.5.6. Crystal Defects, 38.

1.5.7. Twinning, 38–41.

1.6. The Most Important Physical Properties of the Minerals, 42.

1.6.1. Colour, Lustre and Streak, 42–46.

1.6.2. Density, 46–47.

1.6.3. Hardness and Tenacity, 48–49.

1.6.4. Cleavage, Parting and Fracture, 50–51.

1.6.5. Luminescence, 51–53.

1.6.6. Magnetism, 53–54.

1.6.7. Electrical Properties, 54.

Electrical Conductivity, 54–55.

Piezoelectricity, 55–57.

Pyroelectricity; 58–59.

1.6.8. Optical Properties, 59–60.

1.6.9. Miscellaneous Properties, 60.

1.7. Methods for Mineral Study and Identification, 60.

1.7.1. Chemical Analysis, 60.

Wet Chemical Methods, 61.
Various Instrumental Procedures, 61–63.
Presenting Chemical Analysis, 63.
1.7.2. X-ray Diffraction, 63–65.
1.7.3. Vibrational (Infrared and Raman) Spectroscopy, 65–67.
1.8. Mineral Classification, 67–68.
1.8.1. Native Elements, 68.
1.8.2. Sulfides, Arsenides, Antimonides, Selenides and Tellurides, 68–69.
1.8.3. Oxides and Hydroxides, 70.
1.8.4. Halides, 71.
1.8.5. Carbonates, Nitrates and Borates, 72–73.
1.8.6. Sulfates, Chromates, Tungstates and Molybdates, 73.
1.8.7. Phosphates, Arsenates and Vanadates, 74.
1.8.8. Silicates, 75.
Nesosilicates (Orthosilicates), 75–76.
Sorosilicates (Disilicates), 76.
Cyclosilicates (Ring Silicates), 77.
Inosilicates (Chain Silicates), 77–78.
Phyllosilicates (Sheet Silicates), 78.
Tectosilicates (Framework Silicates), 78.
References, 79.
2. Minerals from the Republic of Macedonia, 81.
2.1. Geological Characteristics of the Republic of Macedonia, 83.
2.1.1. West-Macedonian Zone (WMZ), 84–86.
2.1.2. Pelagonian Massif (RM), 87–88.
2.1.3. Vardar-Zone (VZ), 89–91.
2.1.4. Serbo-Macedonian Massif (SMM), 92–94.
References, 95.
.2. Deposits of the Collected Minerals of the Republic of Macedonia, 97.
2.2.1. Alinci, 98–101.
2.2. Alšar, 102–111.
2.2.3. Belutče, 112–113.
2.2.4. Bešište, 113–114.
2.2.5. Bogoslovec, 115–116.
2.2.6. Bonče, 116–117.
2.2.7. Brest, 118.
2.2.8. Bučim, 119–123.
2.2.9. Budinarci, 124–125.
2.2.10. Bukovik, 126.
2.2.11. Crni Vrv, 127–129.
2.2.12. Čanište, 130–132.
2.2.13. Češinovo, 133–134.
2.2.14. Čumovo, 135–136.
2.2.15. Damjan, 137–139.
2.2.16. Debar, 140–143.
2.2.17. Drenovci, 144.

- 2.2.18. Dunje, 145–147.
- 2.2.19. Ginovci, 148.
- 2.2.20. Ilovica, 149.
- 2.2.21. Kobilino Pole, 150.
- 2.2.22. Kokre, 151–153.
- 2.2.23. Košino, 154–155.
- 2.2.24. Kozjak, 156.
- 2.2.25. Krastov Kamen, 157–158.
- 2.2.26. Krstov Dol, 159.
- 2.2.27. Lagovo, 160.
- 2.2.28. Lojane, 161–163.
- 2.2.29. Mrežičko, 164.
- 2.2.30. Mrzen, 165–166.
- 2.2.31. Nebregovo, 167–168.
- 2.2.32. Nežilovo, 169–171.
- 2.2.33. Nistrovo, 172.
- 2.2.34. Nižepole, 173.
- 2.2.35. Osojnica, 174.
- 2.2.36. Pčinja, 175–176.
- 2.2.37. Pehčevo, 176–177.
- 2.2.38. Peklište, 178.
- 2.2.39. Pelagon, 179–181.
- 2.2.40. Petrova Reka, 182.
- 2.2.4.1. Plavica, 183.
- 2.2.42. Plešenci, 184–185.
- 2.2.43. Prilepec, 185–187.
- 2.2.44. Rabrovo, 187–189.
- 2.2.45. Raduša, 189–190.
- 2.2.46. Ramna Niva, 191–193.
- 2.2.47. Ržanovo, 194–201.
- 2.2.48. Sasa, 202–210.
- 2.2.49. Saždevo, 211.
- 2.2.50. Selečka Planina, 212.
- 2.2.51. Sivec, 213–223.
- 2.2.52. Staro Bonče, 224–226.
- 2.2.53. Strelci, 227.
- 2.2.54. Šopur, 228.
- 2.2.55. Štavica, 229–230.
- 2.2.56. Tajmište, 231.
- 2.2.57. Toranica, 232–233.
- 2.2.58. Trojaci, 233–234.
- 2.2.59. Vasov Grad, 235–236.
- 2.2.60. Veprčani, 237–238.
- 2.2.61. Veselčani, 238–239.
- 2.2.62. Vitolište, 240.
- 2.2.63. Vodno, 241.

2.2.64. Vrbsko, 242.
2.2.65. Zletovo, 243–251.
2.2.66. Zvegor, 251–253.
References, 254–257.

2.3. Identified Minerals from the Republic of Macedonia, 259.

2.3.1. Native Elements, 259.
Native Elements Studied by the Authors, 259–267.
Other Native Elements, 268.

2.3.2. Sulfides and Sulfosalts, 269.
Sulfides and Sulfosalts Studied by the Authors, 269–326.
Other Sulfides and Sulfosalts, 327–334.

2.3.3. Oxides, Hydroxides and Halides, 335.
Oxides, Hydroxides and Halides Studied by the Authors, 335–379.
Other Oxides, Hydroxides and Halides, 380–385.

2.3.4. Carbonates, 386.
Carbonates Studied by the Authors, 386–427.

2.3.5. Sulfates and Molybdates, 428.
Sulfates Studied by the Authors, 428–458.
Other Sulfates and Molybdates, 459–461.

2.3.6. Phosphates and Arsenates, 462.
Phosphates Studied by the Authors, 462–469.
Other Phosphates and Arsenates, 470–473.

2.3.7. Silicates, 474.
Silicates Studied by the Authors, 474.
Nesosilicates (Orthosilicates), 474–510.
Sorosilicates (Disilicates), 511–523.
Cyclosilicates (Ring Silicates), 524–565.
Inosilicates (Chain Silicates), 566–603.
Tectosilicates (Framework Silicates), 604–629.
Other Silicates, 630.
Sorosilicates (Disilicates), 630–631.
Inosilicates (Chain Silicates), 631–632.
Phyllosilicates (Sheet Silicates), 632.
Tectosilicates (Framework Silicates), 633.

Experimental Section, 634.
References, 635–636.

2.4. Published Papers by the Members of the Research Group Regarding the Studies of the Minerals from the Republic of Macedonia, 637–641.
Locality Index, 642–643.
Mineral Index, 644–647.
Subject Index, 648–649.
